IMCO-PACS Hosted Solution chosen by Eureka Springs Hospital

(Pewaukee, Wisconsin, USA) IMCO Technologies has been chosen for the hosted PACS solution at Eureka Springs Hospital in Eureka Springs, Arkansas.

The IMCO-PACS hosted solution is being provided with support from Ozark Imaging, the local IMCO-PACS distributor and Integris Tech Data Center, the hosting site.

IMCO-PACS (Picture Archival Communication System) eliminates the use of film and streamlines workflow. Images will be generated digitally and transferred through the network to a server located at Integris Tech Data Center. Images stored at Integris Tech Data Center will be accessed through workstations, allowing doctors to have all the patient information they need, immediately. This process provides optimum information flow, reducing the time from exam completion to interpretation and treatment, thus increasing efficiency. IMCO-PACS hosted solution minimizes the need for on-site IT personnel at Eureka Springs Hospital, enabling Eureka Springs Hospital to maintain their focus on patient care. Behind the scene, IMCO Technologies and Integris Tech Data Center will keep the system working seamlessly.

GO GREEN -- IMCO-PACS is eco-friendly by eliminating the need for chemicals, which are used in the processing of film.

About IMCO Technologies

IMCO Technologies is celebrating its 18th year as a leader and innovator in Imaging and Informatics marketplace. IMCO produces sells and services computer-based products for managing the images and other information of hospitals, imaging centers, medical clinics and orthopaedic practices. Product development has centered on, and continues to center on, the principles of; 1) rapid image retrieval, 2) ease of use, 3) system configurability and modularity, 4) affordability and 5) adherence to industry standards.
