IMCO Technologies Partners with White Mountain Imaging

(Pewaukee, Wisconsin, USA) White Mountain Imaging has become the newest addition of premiere distributors for IMCO Technologies products, further ensuring availability throughout the United States. White Mountain Imaging will offer IMCO's RIS, Scheduler, Practice Manager, and HL7- DICOM Interface products, as well as IMCO's newest product, IMCO-STAT, Closed-Loop Reporting/Critical Test Results Management software.

IMCO Technologies President and CEO, Mark Schwartz has high expectations for the new partnership, saying, "The agreement with White Mountain Imaging significantly expands our nationwide coverage and provides access to new market segments." White Mountain Imaging is headquartered in Webster, New Hampshire, USA, and has dealers throughout the United States. Mr. Paul L. Carbo, Director of Digital Business Development for White Mountain Imaging states, "White Mountain Imaging is very excited about being able to offer the IMCO products to our dealers. IMCO's vast experience and targeted product line, with a reputation for quality, will be a great addition to our digital product portfolio."

IMCO personnel will be present at RSNA 2009 in the White Mountain Imaging booth #3009 (South building) as well as across the aisle in the IMCO Technologies booth #3211 (South building).

If you are interested in learning more about IMCO Technologies product offerings, please call (800) 300-7734, send an email to info@imco-tech.com, or contact White Mountain Imaging at (603) 648-2124.

About IMCO Technologies

IMCO Technologies is celebrating its 19th year as a healthcare solutions provider in the informatics management marketplace. IMCO Technologies newly released IMCO-STAT™ Critical Test Result Management (CTRM) software application addresses the Joint Commission and CCHIT concerns for effective communications and documentation of accountability. IMCO Technologies provides computer-based software applications for hospitals, imaging centers, clinics and orthopaedic practices. Product development centers on the principles of; 1) ease of use, 2) system configurability and modularity, 3) rapid image retrieval, 4) affordability, and 5) adherence to industry standards.
