FOR IMMEDIATE RELEASE:

IMCO Technologies Unveils New Products at RSNA 2010

November 23, 2010

Pewaukee, Wisconsin, USA – IMCO Technologies announces the release of two new products; **IMCO-STAT 4.0 (CTRM)** and **Peer Review** in booth 7020 at RSNA 2010 (Chicago, IL).

IMCO Technologies (IMCO) introduces the newest release of its automated critical test results management (CTRM) solution - **IMCO-STAT 4.0**, at RSNA 2010. The flexible software design allows IMCO to tailor a CTRM solution for the workflow of each customer facility. The new user interface provides easy system navigation and our visual dashboard provides continuous, at-a-glance CTRM status updates. These power packed advantages will allow physicians and facility personnel to quickly adapt to the CTRM system, saving valuable time.

In addition, IMCO is proud to present a new automated **Peer Review Management system** consisting of • Radiologist Peer Review, • Emergency Department Discrepancies, and • Technologist Quality Improvement.

The RSNA convention is held at the McCormick Center in Chicago, IL, from November 28th through December 2.

About IMCO Technologies

IMCO Technologies (IMCO) originated in 1990 with the purpose of being an innovator in the medical informatics marketplace. IMCO develops, sells and services software solutions for information processing and management to hospitals, imaging centers, medical clinics, and orthopedic practices. Product development centers on the principles of (1) ease of use, (2) flexibility of system design, (3) open architecture, and (4) affordability.
