FOR IMMEDIATE RELEASE

Tuomey Regional Medical Center chooses IMCO Technologies' IMCO-STAT 4.0 (CTRM) for their critical test results management solution

November 23, 2010

Pewaukee, Wisconsin, USA – IMCO Technologies announces that Tuomey Regional Medical Center has selected IMCO-STAT 4.0 as their critical test results management (CTRM) solution for deployment in the Emergency Department.

IMCO-STAT's flexible software design allowed Tuomey Regional Medical Center to tailor a CTRM process to fit their workflow requirements. IMCO-STAT 4.0 provides a new user interface for easy system navigation and the visual dashboard allows continuous, at-a-glance alert status updates. The many advantages of IMCO-STAT allow physicians and facility personnel to quickly adapt to the CTRM system, saving valuable time and improving patient care. New management reports provide a tool set for results tracking and continuous performance improvement.

About IMCO Technologies

IMCO Technologies (IMCO) originated in 1990 with the purpose of being an innovator in the medical informatics marketplace. IMCO develops, sells and services software solutions for information processing and management to hospitals, imaging centers, medical clinics, and orthopedic practices. Product development centers on the principles of (1) ease of use, (2) flexibility of system design, (3) open architecture, and (4) affordability.
