IMCO Technologies Announces IMCO-STAT Version 5.0

(Pewaukee, Wisconsin, USA) Critical Test Results Management (CTRM) company, [IMCO Technologies](#) announces the release of IMCO-STAT Version 5.0.

IMCO-STAT 5.0 has enhanced workflow capabilities, which will provide the initiator of the alert (Laboratory, Radiology, Emergency, Cardiology, etc.) multiple ways to create and dispatch notifications. The latest version also provides the receiver of the alert with a wide variety of device options with which to receive and respond to the notification. This version also contains a more robust analytical report section, while still creating an audit trail on 100% of all communications.

This new version is part of the IMCO Technologies line of products used to enhance communications between hospital departments.

About IMCO Technologies

IMCO Technologies is celebrating its 21st year as an innovator in the information management marketplace. IMCO produces, sells and services software solutions in hospitals, imaging centers, radiology reading groups and clinical laboratories. Product development centers on the principles of; 1) ease of use, 2) system configurability and modularity, 3) fast performance, 4) affordability, and 5) adherence to industry standards.
