

## IMCO-store

IMCO offers a full range of storage products to meet the specific requirements of your hospital, imaging center or orthopedic practice. And with the IMCO-store software you can be confident that your patient information is safe and secure.

### Key Features

- **Rapid exam retrieval.** IMCO's storage systems are based upon the latest state-of-the-art technologies and combined with our IMCO-store highly advanced software, our storage systems provide the utmost in rapid exam retrieval.
- **Secure storage.** IMCO-store has been designed with secure storage in mind and a number of backup and redundancy mechanisms are built right into the system.
- **Modular and configurable.** No two institutions are the same and we have designed our storage systems so they can be tailored to fit your exact requirements.
- **Expandable configurations.** Storage that grows as you need it. Eliminates the need to acquire all your storage requirements at the time of installation.
- **Adherence to standards.** The IMCO-store product adheres to industry standards including DICOM, IHE, HL7 and HIPAA.
- **Advanced data compression.** Hardware is expensive and IMCO's unique data compression algorithms allow you to store much more data than you thought was possible, and all without any loss in image quality.
- **Report storage.** In your institution it may be best to store patient reports right with the images and IMCO-store can meet your requirements.
