

IMCO-view

IMCO offers a full range of Viewing Workstation products to meet the needs of radiologists, orthopaedic surgeons and referring physicians. And our IMCO-view software was designed by physicians, so it has all the features you will need, while also being easy to use.

Key Features

- **Rapid image review.** IMCO offers one of the fastest image review capabilities on the market today.
- **Individual display format preferences.** The software automatically displays images according to each radiologist's preferences for display format on multiple high-resolution monitors using IMCO's unique auto-hanging protocol technology.
- **Rapid exam selection.** The software provides sorting and filtering for quick access to exams, which can be selected, based upon patient name, patient ID, date, modality and a variety of other criteria.
- **Key Images.** A summary of selected key images can be rapidly assembled, facilitating consultation with referring physicians.
- **Integrated reporting.** IMCO-view Diagnostic software allows the radiologist to dictate a voice clip that is attached to each case or alternatively a structured report can be entered.
- **Advanced image processing.** This optional feature includes 3-D volume rendering, MPR, MIP, color shading, tissue segmentation and virtual dissection.
- **Additional features.** The workstation user interface is similar to the web browser user interface, allowing for an easy transition. With IMCO-view Diagnostic, patient reports are automatically displayed with the appropriate exam. Voice recognition software is available.

IMCO Technologies

Specifications for IMCO-view

It is IMCO's policy not to inventory hardware. All workstation hardware is purchased when an order is received. This assures the customer that the hardware specifications are those that are currently available on the market.

PC Hardware

- Standard, 2GB RAM
- Intel P4, 3.0GHz Processor
- 80GB, SATA Hard Drive
- 10/100/1000 Ethernet
- nVidia NVS 280 PCI display controller
- Keyboard
- USB Mouse
- Windows XP Pro
- Diskeeper
- Antivirus Software
- PC Anywhere
- UPS

Available Monitors

All monitors quoted are LCD, Flat Panel

Color: 17", 19" 21" 32"

Grayscale: 2MP, 3MP, 4MP & 5MP
